<http://www.nerd-out.com/darrenk/>

GE Digital GE1105P, GE Digital GE1106P

1. Power on your player
2. Press stop and then press play on the player
3. Immediately you should see a language screen (if bought in usa you will have 3 options) select language
4. Then press the repeat button on your remote control
5. Using your remote control, enter the code below. (Note that you must know what region you are currently set to, in order to know which code is appropriate)

*for region 1 use 2,9,3,3,4 (usa and Canada)

*for region 2 use 3,8,7,6,7 (uk, most of western europe, israel, japan, and south africa)

*for region 3 use 5,6,7,3,2 (Russia, most of Africa and central Asia)

*for region 4 use 7,6,8,8,4 (Mexico, Australia, new Zealand, central and south America)

*for region 5 use 5,3,8,1,4 (southeast Asia)

*for region 6 use 2,4,4,6,2, (china)

6. A code should be displayed on the screen indicating the current region setting of your unit.

7. Press the 9 button on your remote control for region free, or 1 for region 1, 2 for region 2 and so on

8. Press the open button on your player

9. Press the pause button on your remote control.

* Insert any DVD and enjoy you are now macrovision free and region free

* if the player sticks on FBI warning screens

1. Press forward search x2 or faster, the disc should skip straight to the main feature.

I hope this helps in disabling the macrovision and region settings on your player

Genica GN-800 Kalua

Eject the tray, Key in on the Remote Control 2180, Enter the Region code 1-6, or enter 9 to enable All Regions (Region Free).

(Alternate Method)

Eject the tray, Using the Remote Control key in the following sequence: ZOOM, A-B RPT, Up Arrow, Left Arrow, Down Arrow, Right Arrow

The words "REGION FREE" should flash briefly on the screen to confirm that the unit is now Region Free.

Goodmans GDVD 100

With no DVD/cd in the tray press set-up->menu->step->prev->next gives access to a secret menu. Region bypass can be accessed.

Goodmans GDVD 124

Region Code Hack: Turn the power on / press 7,4 then select (if this doesn't work, try 77). Secret menu is now enabled. Scroll down with the directional button to set the country code to = 13 or 0 then press [select]
Press set-up to exit & save

Macrovision On-Off: Turn the power on / press 7,4 then select. Secret menu is now enabled). Scroll down to next page with the directional button and press select. Highlight Macrovision and press select, then type in either 1+0 (10) or 0 (0). Press set-up to exit.

Goodmans GDVD 125

Turn on DVD and open draw, press SETUP, select CUSTOM, press 33333.this opens secret settings menu offering regions 0-6.

Goodmans GDVD 131

Make sure the drive tray is empty before proceeding. Press the Setup button on your remote control. Press the VOL+,VOL- , VOL+ ,VOL- . The onscreen display should show "VER #" indicating the currently set region. Using the left and right cursor keys, change the region code to 1 for Region 1, 2 for Region 2, and so on, or set it to 255 for multi-region playback. Press the Setup button on your remote control

Govideo DVP855

Power unit "on", Press "open", Press "set-up", Highlight "custom", Press 3333 a new menu appears called "Secret1". Select region or choose "0" for region-free

Open your DVD-drive, and press this on your Remote: SETUP - 9 - 2 - 0 - 0 - 0 - 0 - STEP - SCHUFFLE - NEXT

Macrovision off:

SETUP-STOP-TITLE-PREV-SETUP

Set this, while disk is running, stays like that until player is set into standby mode.

Grundig GDV 200

Open the tray. Insert region 1 disc. Do not close the tray. Press 0,1,2,3 on the remote. Press Play.

Grundig GDV 210

Same as above

Grundig GDV 212

Same as above

Grundig GDV 620HT

Turn the machine on and open up the DVD tray. Using the remote control press 9817. Change the region to whatever you want or set it to 9 which is Multiregion, press the enter button.

Or

Power on, and open drawer. Key in 3838 with handset. A menu will appear, "Region Code", and "Macro On/Off". Region code can be set by pressing Enter key repeatedly to get desired region, and Macro, on the line below, can be accessed with the "down" button to be turned off if you wish to tape any DVD's. Press Open/Close button to store.

Grundig GDVD 100d

1. Press Play on the remote, followed by 2, 7 and 4.
2. When the display reads '____ ____' enter 005 000 128 156 using the remote.
3. Press Play on the remote.
Your player is now a region 1 only player.

To return it to region 2 only do the following:

1. Press Play on the remote, followed by 2, 7 and 4.
2. When the display reads '____ ____' enter 002 000 128 156 using the

remote.

3. Press Play on the remote.

Your player is now a region 2 only player.

To reset the machine to factory defaults, do the following:

1. Press Play on the remote, followed by 1, 5 and 9.

2. When the display reads '____ ____' enter 004 001 000 140 using the remote.

3. Press Play on the remote.

Grundig Xenaro GDP 5100

This one was written for people who might not quite understand what to do {I was confused by the 5532 stuff and thought it was another code}

1. Select "i" on the remote
2. Choose "installation" [box 5]
3. Choose "extended settings" [box 5]
4. Choose "service menu" [box 3]
5. Choose "dealer service menu" [box 2]
6. A code is needed here, it's 8500.
7. choose "system messages"
8. Choose "on" and press the < button [to the left of the "ok" button on your remote]
9. Go back to the "service menu"
10. Choose "system information"
11. With the remote, press 70307196 [note that the number will not show on the screen while you do this]
12. If you typed it correctly, a box with "system messages" appears and a word or a number will appear next to it.
13. If the word reads "none" then forget the whole thing, as you are already region free... if there's a number there then that is the region your unit is using.
14. Press "ok" on the remote to change the region.
15. Use the down button [directly under the "ok" button on the remote] to

scroll down the list.

16. Select the word "none" to make your unit region free.

17. The warning you see is probably meant to do nothing more than frighten you, I don't think you can damage your player by altering this since it's only altering region codes , which have nothing to do with anything vital to the unit. [no worse than changing TV channels really].

18. press "i" to end.

I'm in Australia and bought my player locally, so it appears that this probably works on all xenaro players.

Grundig Xenaro GDP 6150

1. Get into the Service Menu.
This is not intended for home users, only for service technicians. Therefore you're asked for an access code, it is 8500 for all Xenaro DVD Players.
2. Activate "System Messages" using the Service Menu.
3. Leave the Service Menu and get into the "System Informations" Menu.
4. When you see the System Infos, enter the following code on the remote control. Note that the player will not print the code on the screen, you have to enter it blindly.
The code is: 70307192
(This is the one that differs from the 5100 model.)
5. A system message should appear. It will not appear if you got the code wrong or if you did not activate system messages in the service menu. Confirm the message with OK on your remote.
6. Now a window appears in which you can change your region code. Values 1 to 8 and "none" are possible. "none" will disable the internal check of region codes (i.e. makes the player CodeFree), but RCE titles might not work. This doesn't really matter, as you can change the code as often as you wish to match a specific disc.
7. If you want to, you can disable System Messages again using the Service Menu after you changed the code.

Grunkel DVG-20NT

With the disc out and on press, SETUP, STOP, |<<, >>|

Haus H-2001-S

(Press "STOP" twice. Press "SETUP". Press "VOL+ & VOL-" repeat the sequence twice in quick secession (+,-,+,-). the TV screen will display "VER #" Press left/right cursor keys to change the # -(1,2,3,4,5,6 for desired Zone Code) For All Code -Press 255. Press "SETUP" . The system Zone setting is then completed.

Haus H-615L-S 5.1

At Logo screen, press [STOP] key. Input the digit number in the sequence [2,3,1,7]. Then input the region code, 0 for all, Power off the DVD player . New region code settings will be activated when the DVD is powered on again

Or

(Press, "STOP" twice. Press "1999" The TV screen will show a hidden set-up screen. Select "REGION CODE". And Press, "ENTER" to select desired region code "1 to 6" or "All" of All Code.

- 1.Press "STOP" button twice
- 2.Press number button sequence "7","9","2","8" and "1" to turn OFF Macrovision protection disabled (video friendly)

or

3. Press number button sequence "7", "9", "2", "8" and "0" to turn ON Macrovision protection enabled (not video friendly)

Himage 2290

To make this player multi-region, turn on the player and open the DVD draw. Type 8 8 0 0 using the remote control and then select the relevant region, e.g. 1, 2, 3 etc and 9 for region free. By setting the player to 9 it will play all DVD's including the recently added Region Coding Enhanced DVD's.

Hitachi DVP305U

Power on your player whilst pressing hold both the Play and Stop buttons on the front player

After a short while you should be presented with a set of language options. Release the Play and Stop buttons on the player

You will now need to select a language option between 1 and 6

To convert this player to Multi-Region playback:

Press the Repeat button on the Remote Control

Using the Remote enter the code below, note that you must know what Region your player is currently set to in order to know which code is appropriate

for Region 1 use 2, 9, 3, 3 and 4

for Region 2 use 3, 8, 7, 6 and 7

for Region 3 use 5, 6, 7, 3 and 2

for Region 4 use 7, 6, 8, 8 and 4

for Region 5 use 5, 3, 8, 1 and 4

for Region 6 use 2, 4, 4, 6 and 2

A code should be displayed on the screen indicating the current Region setting of your unit

Press the 9 button on the Remote Control for Region free, or 1 for Region 1, 2 for Region 2 and so on

Press the Open button on your player

Press the Standby button on the Remote Control

If the player sticks on FBI Warning screens:

Press Forward Search x2 or faster, the disc should skip straight to the main feature

Hitachi DVP315E

- o Switch On
- o Eject any DVD/VCD media and make sure the tray is closed
- o Press REPEAT on your remote control
- o On your original Hitachi Remote control SLOWLY enter:

38767

o "02" should appear in the top left corner, this is the current region code. Press 9 on your remote and you are now region free.

Hitachi DVP415U

Open The DVD Drive, While Open, Press and hold Enter. Enter 1 for region 1 and so on insert your region (1-6) DVD.

Hitachi DVP505E

<http://home.swipnet.se/moosenose2/dv-p505.html>

Hitachi DVP515

Same as Hitachi DVP305U

Hiteker BI-600

Turn unit on (on the remote) do the following. Press set-up. Press stop. Press skip left. Press skip right. The hidden menu will appear select regions and choose bypass. Its now region free, you can also shut off macrovision.

Hiteker HE-1120

Turn on player; make sure there's no disk inside!
Press set-up, press stop, press skip left |<< , press skip right |>>

now you are in factory settings screen

you see:

Version: (my player):V25J01131
region ID (standard on region 2)
CSS (for new protection disks?)Standard auto (on)
Macrovision (standard auto)(on)
Automute
Dither

now go with remote on region (blue buttons on remote), press right and choose "bypass" confirm with enter! Macrovision same deal set to "off" confirm with enter (play).

Hoyo 8050D

To change the region code of this player just open the DVD tray and press 1 four times on the remote control followed by selecting desired region code 1 2 3 4... or 0 for all regions

Hyundai HDV-2000

Open the tray. Enter 8-4-2-1. Select zone by Pressing "Enter"

Hyundai HU-2010

Open the discs tray. Click on SETUP in your remote control. Got the sub-menu "Custom Setup" by pressing the right arrow on your remote 3 times. Click four times on the number 3 on your remote control. You should be taken into a new menu "Secret1 Menu" where you can choose any region code you like, or 0 for Multizone. Click on SETUP in your remote control to leave the menu.

Irradio DVD 3

With the tray empty, select the Menu, press 9, Open/Close, then 5, Select region 1-6, Mute.

JNL Digivision 7001

Open the tray. Input the numerical sequence 2180 followed by the zone number of the software you wish to play. This is shown on the DVD as number inside a world globe. (Use 9 for multizone). Close the tray.

To disable macrovision, open the tray. Input the numerical sequence 45611. Close the tray. To reset Macrovision protection input 45610 and close tray.

JNL Digivision 7002

Same as above

JNL Digivision 7003

Turn power on, Open tray, Enter 8421 and press enter, Select "ALL" and press enter. Close tray.

Jocel MP3000

On the remote control type; OPEN, SETUP, MUTE, LAST, NEXT. In the special menu change Region code, disable Macrovision.

JVC XV-511BK

Make sure there is no Disc in the tray. Shut off the unit and unplug it from the AC outlet. Press and Hold the "Play" and "Open/Close" keys, simultaneously on the player and not the remote control. While holding these keys, plug the AC cord back into the outlet. (TEST and CPU ver# will appear on the display). Press DVD Menu twice on the remote.

When the display reads 000 5858 use the up and down buttons to change the 000 to 02E. Using the Left and Right arrow buttons, change the last four digits until they read 0000 for Region Free, 0101 for Region 1, 0202 for Region 2 or 0404 for Region 4. Press Enter on the player. Press Standby and wait 5 seconds. Press Standby again. Your player is now set to the region you requested. If you find some titles do not play on the region 0 setting, you may have to hard select the appropriate region.

JVC XV-515

Locate wire jumper B532 on the printed circuit, near the front panel. It can be found underneath the connector linking this board to the above one. Cut the jumper and turn the power on. Enter password 5963. Turn off the machine and on again.

JVC XV-522

Make sure there is no disk in the tray. Unplug mains AC. on the unit press and hold "play" and "open/close". While holding these keys plug in mains power. Release these keys and test appears on the display. Press "3D-sonic". Press menu twice on the remote. Display reads 000 5858 use down buttons to 000 to 02e

9 change last 4 digits to the following

0000 for region free

0101 for region 1

0202 for region 2

press enter on the remote. Press standby and wait 5 seconds. Press standby again and the player is now set to the region that u desire

If this doesn't work try again with pushing the 3d-sonic button

JVC XV-D2000

Press Power to turn machine off. Wait 5 seconds. Press and hold DVD Menu and On Screen on the machine together, and then press Power on the machine to switch it back on. Let go of the DVD Menu and On Screen buttons. Press Standby on the machine, the display should now show either "TEST 2", "TEST4", or "TEST 6" depending on the machines existing region setting. Press DVD Menu on the machine twice in a row, and the display should now show "000 5858". Press the Up and Down cursor buttons, and change the first three digits to "02E". Press the Right and Left cursor buttons, and change the last four digits to "0000" for Region Free, "0101" for Region 1, "0202" for Region 2, "0404" for Region 4, "0808" for Region 8, and finally "2020" for Region 20 ***See Note at bottom. If you are having problems with Region 4 disks change the above setting to "0458" and make sure PAL or NTSC is correctly set on your machine. Press Enter to confirm the Region change. Press Standby on the machine to turn it off. Wait 5 seconds. Press Standby on the machine to turn it on.

Kendo 530102

Power on the player and press "OPEN" and then push 33088 on the remote, after that press a number for the region code, 0 for all.

Kenwood DVF-3530

Select the "set-up" menu by pressing the Menu button. Select "Audio" by pressing >. Select "Other" using the arrows and press "Enter". Select "7070" (Region Auto) using the number buttons. (7071 = Region 1). Press enter to save the new region. Turn off the DVD player. Wait for a few seconds and turn the player on.

Kenwood DVF-5010

Before loading a disc, press and hold the play button on the unit itself (NOT remote control) for about five seconds. The display panel will then show what region you are (e.g. in Australia it will say Oceania). By using the remote up and down keys, you can then scroll through the regions until you find the region you require. Select it by hitting the enter button. The display will then say "Initial OK!". You are ready to put a disc in.

Keymat V560

Make sure you don't have any DVD inserted and Door Closed. On the Remote Control press SETUP. On the DVD player Front Panel: Press NEXT, Press STOP Press PAUSE/STEP, Press PREV, press NEXT. Then enter the region code

KiSS 1302

Change Region [Setup + Slow + Step Left + Step Right] use left and right arrows to change region.

Kiss DP-330

On Remote Press: Eject, Clear, 276, Enter.

KLH DVD-221

Same as below

KLH DVD-33

Turn on the DVD Player. Use the FCN key to put it in DVD mode. Open the disc tray and wait for the display to say "\OPEN\". On the remote, press 9817. A menu will appear that will allow you to change the region (1,2,3,4,5,6, or 9) and turn macrovision on or off. Use the arrow buttons to select which option you want to change. Use the enter button to change the desired setting. Press the return button to leave the menu. Play DVD's as usual.

Kones DVD-3300

Already region free, but here's how to do the hack for RCE protected DVD movies!

First load movie until you reach the Protected Notice World MAP. Then hit Stop twice, then hit PBC, wait 3 seconds and the PBC will be off, Next hit Play once again and it now plays!

Konka KD-1800U

Open Tray, press 6,6,6,6 then Select on the remote. Scroll down to Country code and set it to "13". Press Select then return to exit.

Lasonic 3200

Open tray, press 4 times 1, press 1 time 9 and Close tray.

Lasonic DVD-1100

open tray, setup, vol+, vol-, vol+, vol-. Version number appears in top right corner set 255 using left-right arrows. Close tray.

Lasonic DVD-2000

If you get an "invalid region" message on screen simply open up the DVD drawer an press 1 1 1 1 followed by the required region

Or

Press the Open/Close button on your remote control, A-B, Up, Left, Down, Right. Region free should flash up.

Lasonic DVD-2100

Open disc tray and leave it open. Press set-up, press Vol.+ then Vol.-, Press Vol.+ then Vol.- again. Top right hand corner will appear reg.1 and use the blue arrow on the remote to choose which region you want or select ver.255=meaning all region. After selecting press set-up and it'll work.

Lasonic DVD-8050

Open tray. Key in 1111 and the region you want to watch (only does 0 to 4), 11110 auto selects the region.

Lecson DVD-900

Press on/standby on front panel of DVD player, then on the remote press the following;
open/close
zoom
a/b
up
left

down
right

Lenco DVD-02

Put on the DVD open the tray. Type in the code 330880 after every number you have to wait until the hand disappears. Now your player is region and macrovision free.

Or

Lenco 202 enter set-up and press 167 on remote. This brings up the region menu, enter the digit from 1 to 6 of the region required.

Lennox DVD2003

DVD on with No disc, Press SETUP NEXT PREV NEXT PREV with remote. You'll see "VER 1" on the upper left corner. With LEFT and RIGHT you can change the value. Change it to 255 (Region Free).

Lennox DVD9000

Open the DVD tray, press the code 9653 on the remote. If you see 00 in the top right corner of the monitor, it means it is region free. If you now select 01,02,03,04,05 or 06 it will select a region manually.

LG 2300

With "no disk" on tray, press sequentially in the remote control PAUSE,3,1,4,5,9: code -- will appear in the display. Enter the region or 0 for region free.

LG 3000

Press the Pause button on your remote control. Using your remote control enter the code 3, 1, 4, 1, 5 and 9, Press the 0 button on your remote control for Region free, 1 for Region 1 or 2 for Region 2. Press the Pause button on your remote control. Power off your player and wait a few seconds. Power on your player

Or

Press the Setup button on your remote control then, Step, Next, Up and Down, select the region of your choice or Bypass for region free, save and then Exit the menu.
